**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/23/08 has been entered.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-5, 7-11, 27, and 28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

4. By the amendment dated 05/23/08, applicant amended independent claims 1 and 8 to recite that the attenuation layer is solid and "in the form of a single layer". Support for this amendment could not be found in the specification and, accordingly, this limitation is considered to constitute new matter. The Examiner has reviewed paragraph [059] of the specification and, contrary to applicant's assertions, was unable to find support for the phrase at issue.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-5, 7-11, 27, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Tonar (USPN 6,193,378) for reasons of record in the Office Action dated 02/25/08 at paragraph 3, which is incorporated herein by reference.

***Response to Arguments***

7. Applicant's arguments filed 05/23/08 have been fully considered but they are not persuasive with respect to the rejection over Tonar.

8. Regarding the rejection over Tonar, applicant's argument is unclear, but appears to be that Tonar fails to teach a solid layer. This is not persuasive. As clearly stated in Tonar, the layer is solid with the materials incorporated into a polymeric matrix (col. 4, lines 36-45, for instance). Such materials are in solid solution and, accordingly, meet the present claims.
